

18<sup>th</sup> March 2020

Dear Parents,

Greetings from Medhaam!

The last few days have been very unpredictable with situations changing every hour. We are very grateful to our entire parent community, who have responsibly kept their children home after our last email. With all our Centres having almost zero attendance today, we are reassured that you have made necessary arrangements to keep your children safe in these difficult times. After personally speaking to all our corporate partners (who have assured us to support our parents), medical practitioners and closely following all the government advisories we have decided to close all our Centres till 31<sup>st</sup> March 2020.

Our team however will be working to provide you lesson plans/videos to home school our children, so that they can use this compulsory quarantine time productively. We will be sending three lesson plans/videos every week along with suggested activities that you can do together as a family.

We strongly advise you stay positive and refrain from talking about your anxiousness in front of our children. With schools closing and so much information (misinformation) floating around children are bound to be confused and have many questions, before answering anything be sure to first manage your stress and anxiety (attached is a WHO advisory on same). It's a great time to teach your children about prosocial behavior — of avoiding getting other people sick, staying home when you're sick, and having to give up things that we like to do because it's better for everybody.

The health and well being of our Medhavis, their families and our team in the heart and soul of what we do, we had to take this difficult decision and are certain that we shall overcome this difficult time, and we will again be enjoying the happy learning days.

Warm Regards,  
Team Medhaam
